**Issue number** 1

**Date of issue** November 2008

**Project number** 2008772

This classification report consists of five pages and may only be used in its entirety.

## 1. Introduction

This classification report defines the classification assigned to **Avery® 500 Event Film Matt applied to a steel sheet** in accordance with the procedures given in EN 13501-1: 2007.

## 2. Details of classified product

### 2.1 General

The product, **Avery® 500 Event Film Matt applied to a steel sheet**, is defined as a multi-purpose vinyl.

### 2.2 Product description

According to the sponsor the product is:

- A 75 micron monomircally plasticised vinyl
- with different 50 matching colours
- with a semi-permanent, acrylic based, adhesive system

The product has a surface density of approx. 102 g/m<sup>2</sup>  
The product is applied to a steel sheet, 1.2 mm thick.

### 2.3 Manufacturer/Importer

## 4. Classification and field of application

### 4.1 Reference of classification

This classification has been carried out in accordance with clause 11 of NEN-EN 13501-1:2007

### 4.2 Classification

The product, **Avery® 500 Event Film Matt applied to a steel sheet**, in relation to its reaction to fire behaviour is classified:

**B**

The additional classification in relation to smoke production is:

**s1**

The additional classification in relation to flaming droplets / particles is:

**d0**

**Reaction to fire classification: B-s1, d0**

### 4.3 Field of application

This classification is valid for the following product parameters:

- Thickness 75 micron
- Surface density 102 g/m<sup>2</sup>

This classification is valid for the following end use applications:

- Substrate steel sheet ≥ 1.2 mm - non-combustible (class A1/A2 according to EN 13501-1)
- Air gap 40 mm
- Methods and means of fixing with a semi-permanent, acrylic based, adhesive system
- Joints no joints
- Other aspects of end use conditions multi-purpose vinyl

#### 4.4 Duration of the validity of this classification report

There are no limitations in time on the validity of this report.

#### 5. Limitations

This classification document does not represent type approval or certification of the product.

The classification assigned to the product in this report is appropriate to a declaration of conformity by the manufacturer within the context of system 3 attestation of conformity and CE marking under the Construction Products Directive.

The manufacturer has made a declaration, which is held on file. This confirms that the product's design requires no specific processes, procedures or stages (e.g. no addition of flame-retardants, limitation of organic content, or addition of fillers) that are aimed at enhancing the fire performance in order to obtain the classification achieved. As a consequence the manufacturer has concluded that system 3 attestation is appropriate.

The test laboratory has, therefore, played no part in sampling the product for the test, although it holds appropriate references, supplied by the manufacturer, to provide for traceability of the samples tested.

This report is issued by Efectis Nederland BV (previously **TNO** Centre for Fire Research). Efectis Nederland BV and her sister company Efectis France are full subsidiaries of Efectis Holding SAS since 1 January 2008, in which the Dutch TNO and the French CTICM participate. The activities of the TNO Centre for Fire Research were privatized in Efectis Nederland BV since 1<sup>st</sup> July 2006. This is in response to international developments and requests by customers. In order to be able to give a better answer to the customer's request and offer a more comprehensive service of high quality and a wider range of facilities, the international collaboration has been further expanded. This is done with highly experienced partners in fire safety in Norway (Sinter-NBL), Spain (Afiti-Licof), Germany (IFT), USA (South West Research Institute) and China (TFRI).
