1 Introduction

The **V Series** flatbed cutting tables are capable of cutting rigid materials as well as soft.

The cutting table base unit comes equipped with 1 (Invicta) or 2 tool modules (Optima, Integra and Omnia), a standard cutting tool and a vacuum pump or multiple depending on models. An optical camera recognition system for accurate contour cutting of printed flexible or rigid substrate materials is available upon request.

A variety of tools, and knives are also available, depending on products and different applications.

2 Different Models

The **V Series** flatbed cutting tables are available in different sizes and configurations. Depending on the region, certain sizes and or configurations may not be available. Also branding may be different. In this section we refer to the basic model names Invicta, Optima, Integra and Omnia. Where known, it is marked if a specification is configuration depended.
